	LU2346228112 LU2372745393 LU2372745559 LU2372745476 LU2372745120	<p>The <i>Sustainable Global Infrastructure Fund</i> seeks to maximise long term total return and invest at least 80% of its total assets in the equity securities of companies whose predominant economic activity is in the infrastructure sector and with a particular focus on companies aligned with and supporting the objectives of the UN Sustainable Development Goals (“UN SDGs”). The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the infrastructure sector.</p> <p>In normal market conditions the Fund will invest in a relatively concentrated portfolio of equity securities of companies with large, medium and small market capitalisation across a broad range of infrastructure sub-sectors including (without limitation) regulated utilities, renewables, transportation and communications. The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the infrastructure theme and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer term issues surrounding ESG and the potential impact this may have on a company’s financials. The assessment of the level of engagement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>Although it is likely that most of the Fund’s investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets.</p> <p>The Fund will apply a custom ESG screen which incorporates multiple components. First, a screen is used to limit or exclude direct investment (as applicable) in corporate issuers which, in the opinion of the Investment Adviser: have any exposure to, or ties with, controversial weapons or conventional weapons; the production, distribution, licensing, retail or supply of tobacco or tobacco-related products; the production or distribution of firearms or small arms ammunitions intended for retail civilians; are deemed to have failed to comply with one or more of the ten United Nation Global Compact Principles (“UNGC”), which cover human rights, labour standards, the environment and anti-corruption. The Investment Adviser also intends to limit direct investment in securities of issuers involved in the extraction of, or the generation of power using, thermal coal or tar sands (also known as oil sands). The Investment Adviser may invest in the securities of issuers with higher levels of revenue from these activities if the issuer has committed to a net zero transition plan.</p> <p>Secondly, the Investment Adviser will look at the targets and the indicators for <u>certain each UN Sustainable Development Goal SDG namely SDG3 (Good Health& Well-Being), SDG 6 (Clean Water& Sanitation) SDG 7 (Affordable& Clean Energy), SDG 9 (Industry, Innovation &Infrastructure) SDG 11 (Sustainable Cities &Communities) and SDG 13 (Climate Action)</u> and identify those that are supported by the sustainable infrastructure theme. The Investment Adviser screens the investment universe to invest only in companies that align with and advance at least one of the <u>UN SDGs, in particular</u> <u>As part of the climate objective of the Fund, the Investment Adviser seeks to invest in companies that enhance the energy transition in line with objectives SDG 7 (Affordable and Clean Energy) and SDG 13 (Climate Action).</u> In both cases the assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</p> <p>The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects.</p> <p>Thirdly, the Investment Adviser conducts an enhanced analysis on all companies selected based on the <u>proprietary methodology of its in-house ESG framework, of which the internally generated data produces ESG scores for the target companies. To undertake this analysis, the Investment Adviser may also use data provided by external ESG data providers and/or local intelligence.</u> In this respect, companies are evaluated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the infrastructure theme and their ESG risk and opportunity credentials, <u>such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company’s financials. Based on the in-depth assessment of the abovementioned factors, the Investment Adviser calculates an ESG score for each portfolio company. The assessment of the level of engagement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.</u></p>
